

Aimed to the Network Operator

HEXYLON is a high performance Multistandard TV and Radio Analyser intended for the professional user with advanced features, high measurement accuracy and the most intuitive user interface in the market

GSERTEL

One device, full functionality

► All the Standards

DVB-T/T2

ISDB-T/Tb

DVB-S/S2X

DVB-C

ANALOG TV

FM

DAB/DAB+

TSoIP

HEVC

► All the Interfaces

RF

ASI

нрмі

GPS

USB

Wi-Fi

FO

ΙP

Wi-Fi

Full connectivity and deep Wi-Fi analysis.

GPS

Detailed map and coverage analysis.

Where content becomes the interface

Scan View

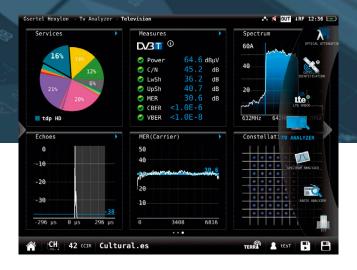

- ► ALL THE CHANNELS IN THE BAND AT A GLANCE
- **▶ ULTRA-FAST SCAN OF THE ENTIRE BAND**
- ► AUTOMATIC PRESENT CHANNELS IDENTIFICATION AND MEASUREMENTS
- COLOR BAR GRAPH REPRESENTATION OF THE CHANNELS ACCORDING TO THE QUALITY LIMIT SET BY THE USER
- ► FULL SIGNAL SPECTRUM
- ► LIST OF ALL CHANNELS WITH THE RELATED MEASUREMENTS AND CHECKMARKS
- ► LEARNING PLAN FUNCTIONALITY

Due to the revolutionary interface and the advanced functionalities, the **measurement and diagnose times** are greatly reduced. HEXYLON establishes a new concept of usability in measurement instrumentation, where the content becomes the interface, and everything flows intuitively through naturalness in the gestural commands.

With a **real multitouch navigation on high resolution 8" screen**, elements react to user actions the way he expects, offering greater usability. Measurement tools have never been used in such a simple way.

User Defined Widgets

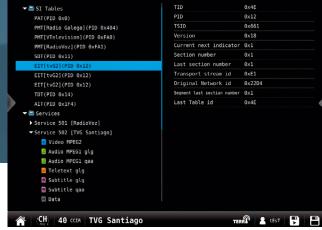

- ▶ UP TO SIX USER-SELECTED SIMULATENOUS WIDGETS IN ONE SCREEN
- ALL THE INFORMATION RELATED TO THE TUNED CHANNEL WITH A SIMPLE LOOK
- ► REVOLUTIONARY USER EXPERIENCE
- DOUBLE-TAP ON THE WIDGET IN ORDER TO GET THE FULL SCREEN VIEW
- ► NO COMPLEX MENUS
- ► ALL FUNCTIONS AVAILABLE ON THE SAME WHEEL MENU

- ► MULTIPLE DESKTOP WITH SIMULTANEOUS WORK ENVIRONMENT
- CUSTOMIZATION: DEFINE YOUR OWN DESKTOP EASILY BY TAPPING ON THE TOP BAR OF THE SCREEN
- 20MHZ ULTRA-FAST SPECTRUM ANALYSER (50MHZ FOR SATELLITE BAND)

TV Analyser

CUS ↓RF 13:08 ■

PDP2

Where others are blind, HEXYLON keeps seeing. The exclusive Path Delay Profile patent feature allows to measure echoes without demodulating the signal up to 1.148µs.

TS Analysis

Treeview of PSI/SI tables with content decoding.

TS Recording

Allows to save and playback a sample of a TS (SPTS or MPTS) or T2-MI signal in the onboard **64Gb** storage.

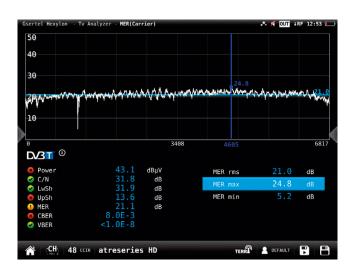

RF Recording

Catch any RF signal up to 25MHz bandwidth and save it for further analysis.

► T2-MI Analysis

Provides the reception of a T2-MI signal and its analysis: L1 signaling, L1 post-signaling, DVB-T2 timestamp, PLP, BB.

MER/Carrier

Find any interference in your channel, is invisible for a traditional spectral analysis and make decrease the quality of your signal.

Advanced Info

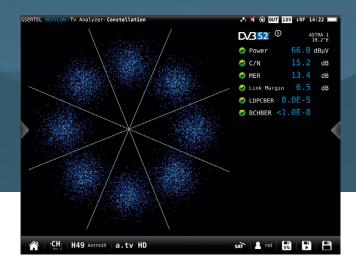

Exhaustive information about the modulation parameters.

Alarms

Thanks to this feature that shows all the priority 1, 2, and 3 TS alarms generated by the Hexylon in a period of time selected by the user, you can detect any failure in the TS layer.

. . ✓ OUT ↓RF 12:38 📧 **D/3T** 0 Standard DV3T BW .OMHz) Constellation 64QAM LwSh N. Carriers 8K UpSh dB Guard Interval MER dB Code Rate CBER Offset VBER Cell ID 1.0E-4 1.0E-2 12:38:15 (CH) 38 CCIR laSexta TERRÎ 💄 DEFAULT 8

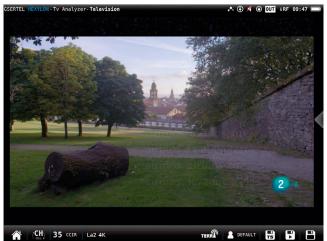

Constellation

Constellation diagrams are an indispensable tool to help detect the presence of noise, phase jitter, interferences, and gain compression, all of which impact on the signal quality and thus reduce the Modulation Error Ratio (MER).

Measurements

Access to all the measurements of the channel at any instant included in a range of time selected by the user.

Services

This feature shows a bitrate distribution graph of the channel services, as well as all the information relative to them.

Real Live 4K Video

Ultra HD signals real-time display.

Spectrum Analyser

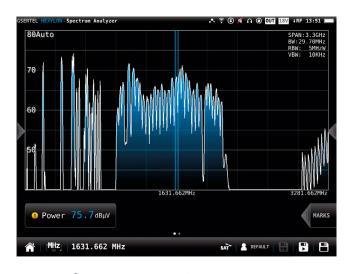

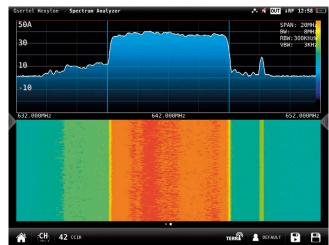

Fast and Accurate

With a sweeping time <10ms, and multiple RBW and VBW filters, the HEXYLON spectrum analyser allows a deep analysis of any signal between 5MHz and 3.3GHz.

Trigger by Level

Catch any pulsed signal in your network using this feature, with trigger level defined by the user.

Continuous Band

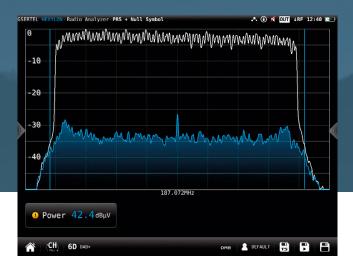

The entire band at a glance with the HEXYLON's continuous band spectrum. From 5MHz to 3.3GHz.

Waterfall

The waterfall diagram is a three-dimensional representation of the signal spectrum, in frequency and time. Signal levels are converted to colors and displayed along a time axis, enabling the detection of the spurious interferences.

Radio Analyser

Parameter Value Standard DAB BW 1.536 MHz Signal BW 1.536 MHz TX Mode Mode I Constellation DQPSK TII main ID 14 TII sub ID 2

PRS+Null Symbol

This feature shows two spectrum overlapped charts: one is the representation of the phase reference symbol (PRS), and the other one is the representation of the null symbol.

► DAB+ Parameters including TII

It shows exhaustive information about the modulation parameters, including the Transmitter Identification Information (TII).

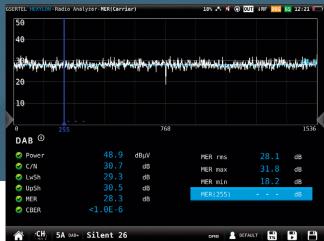

Radio Info

It shows all the information about the tuned channel. For FM channels it is shown the RDS information, and for DAB channels it is shown the Ensemble, the Service, and the Radiotext information.

Echoes

This feature displays the echoes of the received. Level and distance information related to the main beam are shown.

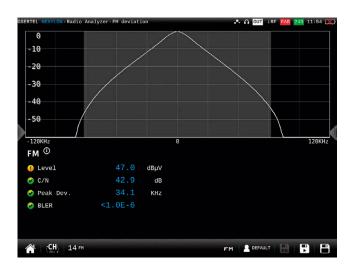

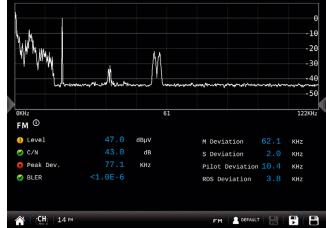

Errored FIB

This feature makes an errored fast info blocks (FIB) analysis of the fast info channel (FIC) during a time interval selected by the user.

MER/Carrier

This feature represents MER value per each carrier of the DAB signal.

FM Deviation

It shows the difference between an FM modulated frequency and the nominal carrier frequency.

MPX Spectrum

This feature shows the spectrum of the demodulated FM signal, the FM channel measurements, and several deviation measurements: mono, stereo, pilot and RDS deviations.

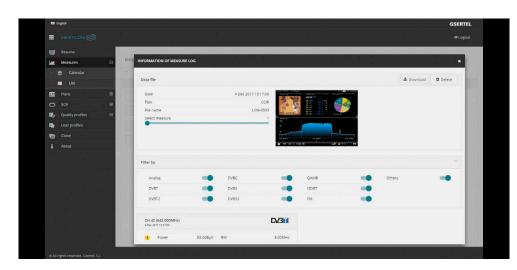

The simplest way to get the highest benefit of your HEXYLON

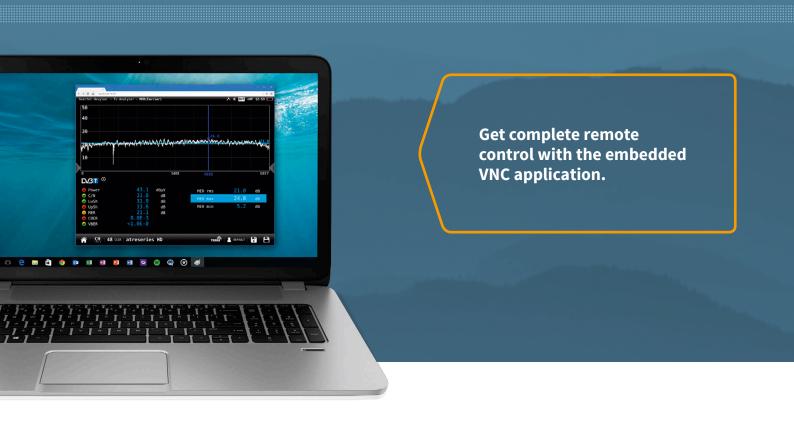

Web Application & Personal Cloud

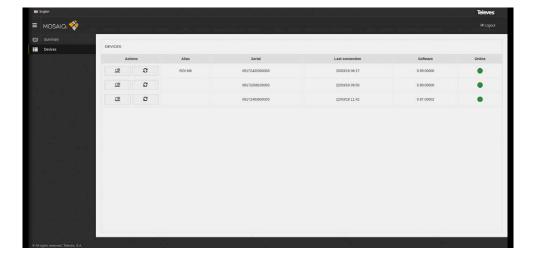

Present a Google Map trace view with GPS measurements.

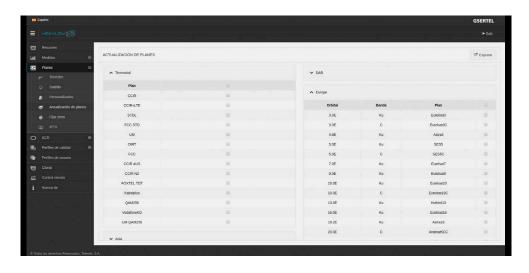

Analyze and download logs, measurements, screenshots, recordings...

Access to the information of your devices from everywhere.

Configure your standard channel plans according to your working geographical area. Then edit or add new channel plans in a simple way, as well as user profiles and upload all to your HEXYLON.

General Specifications

Display	8" Touch Screen TFT 1024x768 Full Color
Weight	2150g
Dimensions	250x210x60 mm (HxWxD)
Power supply	Input: 100-240V ~ 50-60Hz Output: 12VDC, 4A
Battery	Li-ion (7,2VDC, 9000mAh). Field swapable.

Operating time	> 4 hours
Oper. temperature	-5°C to 45°C (23°F to 104°F)
Storage temperature	-20°C to 70°C (-4°F to 158°F)
Humidity	5% to 95% without condensation
Interfaces	ETH, USB, HDMI, Audio Out (Jack), Optical fiber connector FC/APC, GPS antenna connector
Storage	64 Gb
